

Main.java		Output
<pre>1 public class Main { 2 public static void main(String[] args) { 3 System.out.println("Hello World"); 4 } 5 }</pre>	<div>Run</div>	<pre>Hello World === Code Execution Successful ===</pre>

Explanation:

This simple Java program does the following:

- Defines a class named **Main**.
- Contains a **main** method, which is where the program starts.
- Prints "Hello World" to the screen.
