

Main.java	Run	Output
<pre>1 public class Main { 2 public static void main(String[] args) { 3 int myNum; 4 myNum = 15; 5 System.out.println(myNum); 6 } 7 } 8</pre>		<p>15</p> <p>=== Code Execution Successful ===</p>

Explanation:

I made a box named “myNum”, put the number “15” inside it, and told Java to show what’s inside the box.
