ERROR!
Main.java:3: error: not a statement
    System.out.println(This sentence will produce an error);
```

Explanation:

This program is trying to print a message to the screen using "System.out.println(...)."

But there's a mistake:
 The text you're trying to print — "This sentence will produce an error" — is not inside double quotes.
The way to fix it:
Wrap the sentence in quotes.
Java doesn't understand words without quotes unless they are identifiers (such as variable names). That's why it gives an error.
