Main.java   Share   **Run**   Output

```java
1  public class Main {
2    public static void main(String[] args) {
3      System.out.println("Hello World!");
4      System.out.println("I am learning Java.");
5      System.out.println("It is awesome!");
6    }
7  }
8
```

```
Hello World!
I am learning Java.
It is awesome!

=== Code Execution Successful ===
```

Explanation:

This Java program:

- Defines a class and a "main" method.

- Prints three lines of text to the screen.

- Helps you practice multiple print statements, which is a common first step in learning Java.
