Main.java   Share   **Run**   Output

```java
1  public class Main {
2    public static void main(String[] args) {
3      System.out.println("Hello World"); // This is a comment
4    }
5  }
6  
7  
```

```
Hello World

=== Code Execution Successful ===
```

Explanation:

I told Java to print "Hello World", and then added a little note for myself or others next to it using "//."

Java just ignores that note and does the printing.
