| Main.java | | | | Share | Run | Output |

```java
1  public class Main {
2    public static void main(String[] args) {
3      System.out.println(2 * 5);
4    }
5  }
6
```

```
10

=== Code Execution Successful ===
```

Explanation:

I'm telling Java: "Multiply 2 by 5 and show me the result."
Java does the math, gets "10", and prints it on the screen.
