```java
public class Main {
    public static void main(String[] args) {
        final int myNum = 15;
        myNum = 20; // will generate an error
        System.out.println(myNum);
    }
}
```

```
ERROR!
Main.java:4: error: cannot assign a value to final variable myNum
    myNum = 20; // will generate an error
    ^
1 error

=== Code Exited With Errors ===
```

Explanation:

I told Java: "This number will never change."

But then I tried to change it.

Java stops and says, "You promised it was final! You can't change it now."
